OUR MISSION

Coastal Risk's mission is to help billions of coastal residents in the U.S. and around the world, and the businesses and governments that serve them, get "Climate Ready and Storm Safe". Using cloud-based, geospatial data and analytics, our comprehensive climate impact vulnerability assessments (tides, storm surges, and heavy rainfall), have revolutionized flood prediction modeling.

Coastal Risk Consulting & Village of Key Biscayne

Climate Vulnerability Study

The Village of Key Biscayne has retained **Coastal Risk Consulting** to conduct a comprehensive Sea Level Rise (SLR) Vulnerability Analysis, assess the impacts of SLR in terms of critical infrastructure and natural systems, and prepare an Adaptation Plan with recommendations on specific measures and options that improve the Village's resilience.

During this process, Coastal Risk will assemble Village of Key Biscayne residents' ideas on how they envision their future community will look, in order to properly design and implement climate adaptation strategies that best meet the needs of the residents of the Village of Key Biscayne.

Your support and cooperation is very important to the success of this endeavor.

Finalist" 2015

Key Biscayne's Citizen Scientist Project

The Key Biscayne Community Foundation's mission is to enable, facilitate, and empower residents to make a positive difference in the local, greater, and global community through programs, grant making, fiscal scholarship, and community leadership.

KBCF, through its Citizen Science Project, is working with the Village of Key Biscayne and has obtained a grant from NOAA and Florida Sea Grant in order to retain Coastal Risk Consulting to perform an assessment and create a plan to address sea level rise on the Key. This plan will have a holistic approach to take into consideration many of the Village's 12/24-Month Capital Initiatives and Improvement Priorities, including:

- Sea Level Rise mitigation plan and implementation
- Burying of power lines
- Land acquisition
- Dog park completion
- Beach re-nourishment
- Transportation issues
- Beach Club property
- Parking
- Continued emphasis on public safety
